1. Purpose of the Document

The purpose of this document is to communicate to market participants the processes and detailed documentation surrounding invoicing, payment and disputes associated with:

- DUoS charges
- Transaction charges for services carried out on behalf of the Supplier
- Application of the PSO Levy or Payment .

This document should be read in conjunction with :

- MPD 34 DUoS, Transaction and PSO Payment Process
- Market Message Implementation Guide DUoS and Transaction
 Payments
- Supplier Communications Resulting from DUoS Billing and Invoicing
- Distribution Use of System Agreement Framework Agreement Approved by CRU on 9th November 2009
- PSO Invoicing and Collection Procedures
- WP0029 Procedure for Application of the PSO Levy for Commercial Storage

2. Summary

Sections three to five describe the invoicing, payment and disputes processes for DUoS, Transaction and PSO rates. . The associated documentation is introduced and explained.

Sections six to eight illustrate how the documentation should be interpreted through the use of sample business scenarios.

Section nine describes the format and content of DUoS, Transaction and PSO backing documentation.

3. The DUoS Invoicing, Payment and Disputes Process

3.1 Overview of process

ESB Networks invoices Suppliers twice a month for DUoS charges, mid-month and at month end. ESB Networks sends an invoice to the Supplier along with backing documentation, which allows the Supplier to validate the amount due. The Supplier makes payment via an EFT and sends a 507C control market message and remittance advice to ESB Networks to facilitate the processing of the payment.

The following sections describe the process and documentation relating to Supplier DUoS invoicing in more detail.

3.2 Invoicing

Individual MPRNs registered with the Supplier are invoiced at various points during the billing period. These individual invoice items are aggregated and a single DUoS invoice is created for the Supplier. This process is described in greater detail in *Supplier Communications Resulting from DUoS Billing and Invoicing*, section 3.

The documentation created at each instance of invoicing is as follows:

- Invoice *
- Credit Note *
- DUoS Group Summary *
- MPRN Level Invoice Items Detail **
- Account Statement *
- Dispute Summary *
- Dispute Detail **
- Remittance Advice ***

* PDF format.

- ** Flat file format.
- *** MS Excel file.

This information is sent to the Supplier via the Secure File Transfer Service (SFTS) or Encrypted Email (EE).

Each of these documents will be briefly explained below. Section 6 illustrates how each document should be interpreted using a number of invoicing scenarios.

<u>Invoice</u>

This is a VAT document that indicates the amount relating to MPRNs billed in the period since the previous invoice (referred to as charges for current billing period). Where applicable, a second line on the invoice includes re-invoiced amounts for MPRNs billed in previous periods, but subsequently reversed (referred to as adjustment debit charges). These re-invoiced amounts can arise out of Supplier disputes or can be triggered by other processes within ESB Networks.

VAT is calculated and shown separately for each of the two lines.

The document indicates the due date, which is calculated in accordance with the *Distribution Use of System Agreement*.

Credit Note

The credit note includes reversals of MPRN amounts charged in previous invoices (referred to as adjustment credit charges). These reversals can arise out of Supplier disputes or can be triggered by other processes within ESB Networks. The associated VAT is shown on a separate line.

DUoS Group Summary

This report shows an analysis of the net invoice and credit note amounts by DUoS group, split between the component charges i.e. day energy consumption, night energy consumption etc.

MPRN Level Invoice Items Detail

This flat file contains line items at MPRN level, also referred to as invoice items. The gross amount for each invoice item is shown. This gross amount is relevant when disputing invoice items (refer to section 3.4.2). Section 9 describes the format and content of this flat file in detail. See also Section 7 of the *Supplier Communications Resulting from DUoS Billing and Invoicing*, which provides a comprehensive guide to interpreting the data contained in this flat file.

Account Statement

This report shows all movements on the Supplier's account since the previous statement i.e. opening balance brought forward, payments received from the Supplier during the period, invoices and credit notes issued by ESB Networks during the period and the resulting closing balance on the Supplier account.

The amount due from the Supplier is calculated as the above closing balance less any designated disputes in progress. Designated disputes are discussed in detail in section 3.4.2.

Dispute Summary

This report shows, by invoice, the status (e.g. in progress, accepted, denied) and gross value of disputes.

Dispute Detail

This flat file supports the dispute summary. It contains each disputed invoice item. Section 9 describes the format and content of this flat file in detail.

Remittance Advice

This spreadsheet reflects the amount due as per the account statement i.e. the current invoice and resolved designated disputes from previous invoices. The Supplier completes this document by inserting the 507C control message amount (refer to section 3.3) applicable to the current invoice, which automatically calculates the EFT amount. The Supplier returns the advice to ESB Networks to facilitate the processing of the payment against the appropriate invoice items.

3.3 DUoS Payments

Upon receipt of the documents via SFTS / EE, the Supplier:

- Validates the amount due to ESB Networks using the documentation received via SFTS / EE.
- Submits a 507C control market message confirming the gross amount and number of designated disputes raised on the current invoice. The purpose of the 507C message is to facilitate the allocation of the Supplier's payment against the current invoice. **Therefore it is**

important that the Supplier always sends a 507C message whether they have raised designated disputes or not.

- Completes the remittance advice by inserting the 507C control message amount and returns it to ESB Networks.
- Pays the amount due as per the remittance advice via EFT by the due date. This due date is as defined in the *Distribution Use of System Agreement.*

3.4 DUoS Disputes

As discussed above, the Supplier validates the amount due using the documentation received via SFTS / EE from ESB Networks. As part of this process, the Supplier may dispute invoice items on the current invoice.

A Supplier may raise two types of disputes:

- Non Designated Disputes
- Designated Disputes

Designated disputes are defined in the *Distribution Use of System Agreement* as occurring when:

- there is an error in the information used for the calculation or an arithmetic error in the calculation of Use of System Charges by the Company which is apparent on the face of the account and/or
- the Company chooses not to use the half-hourly data (whether actual or estimated) for the purposes of Settlement in calculating Use of System Charges and the User disputes the accuracy or validity of the data actually used.

All other disputes are termed non-designated.

3.4.1 Non Designated Disputes

Disputes raised for reasons other than those included in section 3.4 are termed non-designated.

The Supplier raises a non-designated dispute in a timeframe in accordance with the *Distribution Use of System Agreement*.

These disputes are communicated offline to the designated office as specified on the DUoS invoice.

The Supplier <u>must</u> make a payment for the amount under dispute by the due date in accordance with the *Distribution Use of System Agreement* i.e. the Supplier <u>cannot</u> withhold payment for a non-designated dispute.

Non-designated disputes will be resolved in a timeframe in accordance with the *Distribution Use of System Agreement*. ESB Networks will close the dispute only after confirming the resolution with the Supplier.

In the case of an accepted non-designated dispute, the original invoice item will be reversed and re-billed if necessary. These adjustments will be included in the subsequent invoice and credit note issued by ESB Networks. All other documentation issued via SFTS / EE will also reflect the reversed and re-billed amounts. For further information on billing reversals, refer to *Supplier Communications Resulting from DUoS Billing and Invoicing*, section 5.7

A denied non-designated dispute will have no impact on the next invoice/credit note and associated documentation as the item has been paid and no billing adjustment is required.

3.4.2 Designated Disputes

The Supplier raises designated disputes in a timeframe in accordance with the *Distribution Use of System Agreement*.

The Supplier notifies ESB Networks of designated disputes by sending a 507 Market Message for each disputed invoice item. When all designated disputes have been raised for an invoice, the Supplier sends a 507C control Market Message to EBS Networks confirming the total gross amount and number of all designated disputes raised on the current invoice. The *Market Message Implementation Guide – DUoS and Transaction Payments* contains instructions for sending 507 and 507C messages.

The Supplier withholds payment of the total amount of the disputed invoice items as reflected in the 507C control message. The gross amount for each invoice item is available in the *MPRN Level Invoice Item Detail* flat file.

Designated disputes will be resolved in a timeframe in accordance with the *Distribution Use of System Agreement*. EBS Networks will close the dispute only after confirming the resolution with the Supplier.

Upon resolution, designated disputes become due for payment in accordance with the *Distribution Use of System Agreement*. In the case of an accepted designated dispute, the next invoice and credit note that issue will include a reversal of the original disputed invoice item and a re-invoiced amount, where appropriate.

The original gross amount of a denied designated dispute is due for payment.

4. The Transaction Invoicing, Payment and Disputes Process

4.1 Overview of process

ESB Networks invoices Suppliers at month end, for transactions carried out for that Supplier during the month.

ESB Networks sends an invoice to the Supplier along with backing documentation, which allows the Supplier to validate the amount due. The Supplier pays the amount due via an EFT and sends a 507C control market message and remittance advice to ESB Networks to facilitate the processing of the payment.

The following sections describe the process and documentation relating to transaction charges in more detail.

4.2 Invoicing

The documentation created at each instance of invoicing is as follows:

- Invoice*
- Credit Note *
- Detailed Transaction Charges (debit charges)**
- Detailed Transaction Charges (credit charges)**
- Account Statement *
- Dispute Summary *
- Dispute Detail **
- Remittance Advice ***

* PDF format.

** Flat file format.

*** MS Excel file.

This information is sent to the Supplier via SFTS / EE.

Each of these documents will be briefly explained below. Section 7 illustrates how each document should be interpreted using a number of invoicing scenarios.

Invoice

This is a VAT document that indicates the total charge for transactions carried out for the Supplier during the month. The associated VAT is shown on a separate line.

The document indicates the due date, which is calculated in accordance with the *Distribution Use of System Agreement*.

Credit Note

The credit note is a VAT document which shows reversals of transaction charges included in previous invoices. The reversals are split on the face of the credit note as follows - credits for unpaid invoice items (i.e. accepted designated disputes) and credits for paid invoice items (i.e. accepted non-designated disputes and other reversals). The associated VAT for each type is shown separately.

Detailed Transaction Charges

This flat file contains line items for each transaction, referred to as invoice items. Separate flat files are created for both invoice and credit note. The gross amount is relevant when disputing invoice items (refer to section 4.4.2). Section 9 describes the format and content of this flat file in detail.

Account Statement

This report shows all movements on the Supplier's account since the previous statement i.e. opening balance brought forward, payments received from the Supplier during the period, invoices and credit notes issued by ESB Networks during the period and the resulting closing balance on the Supplier account.

The amount due from the Supplier is shown as the above closing balance less any designated disputes in progress. Designated disputes will be discussed in detail in section 4.4.2 below.

Dispute Summary

This report shows, by invoice, the status (e.g. in progress, accepted, denied) and gross value of disputes.

Dispute Detail

This flat file supports the dispute summary. Section 9 describes the format and content of this flat file in detail.

Remittance Advice

This spreadsheet reflects the amount due as per the account statement, which includes the current invoice, credits for previously paid invoice items now reversed and unpaid denied designated disputes from previous invoices. The Supplier completes this document by inserting the 507C control message amount (refer to section 4.3) applicable to the current invoice, which automatically calculates the EFT amount. The Supplier returns the advice to ESB Networks to facilitate the processing of the payment against the appropriate invoice items.

4.3 Transaction Payments

Upon receipt of the documentation via SFTS / EE, the Supplier:

- Validates the amount due to ESB Networks using the documentation received via SFTS / EE.
- Submits a 507C control message confirming the gross amount and number of designated disputes raised on the current invoice. The purpose of the 507C message is to facilitate the allocation of the Supplier's payment against the current invoice. Therefore it is important that the Supplier always sends a 507C message whether they have raised designated disputes or not.
- Completes the remittance advice by inserting the 507C control message amount and returns it to ESB Networks.
- Pays the amount due as per the remittance advice via EFT on the due date. This due date is as per the *Distribution Use of System Agreement*.

4.4 Transaction Disputes

As discussed above, the Supplier validates the amount due using the documentation received via SFTS / EE from ESB Networks. As part of this process, the Supplier may dispute invoice items on the current invoice.

A Supplier may raise two types of disputes:

- Non Designated Disputes
- Designated Disputes

Designated disputes are defined in the *Distribution Use of System Agreement* as occurring when:

- there is an error in the information used for the calculation or an arithmetic error in the calculation of Use of System Charges by the Company which is apparent on the face of the account and/or
- the Company chooses not to use the half-hourly data (whether actual or estimated) for the purposes of Settlement in calculating Use of System Charges and the User disputes the accuracy or validity of the data actually used.

All other dispute reasons are termed non-designated.

4.4.1 Non-Designated Disputes

Disputes raised for reasons other than those included in section 4.4 are termed non-designated.

The Supplier raises a non-designated dispute in a timeframe in accordance with the *Distribution Use of System Agreement*.

These disputes are communicated offline to the designated office as specified on the Transaction invoice.

The Supplier <u>must</u> make a payment for the amounts under dispute by the due date in accordance with the *Distribution Use of System Agreement* i.e. the Supplier <u>cannot</u> withhold payment for a non-designated dispute.

Non-designated disputes will be resolved in a timeframe in accordance with the *Distribution Use of System Agreement*. ESB Networks will close the dispute only after confirming the resolution with the Supplier.

In the case of an accepted non-designated dispute, the original invoice item will be reversed and re-billed if necessary. These adjustments will be included in the subsequent invoice and credit note issued by ESB Networks. All other documentation issued via SFTS / EE will also reflect the reversed and re-invoiced amounts.

A denied non-designated dispute will have no impact on the next invoice/credit note and associated documentation as the item has been paid and no adjustment is required.

4.4.2 Designated Disputes

The Supplier raises designated disputes in a timeframe in accordance with the *Distribution Use of System Agreement*.

The Supplier notifies ESB Networks of designated disputes by sending a 507 Market Message for each disputed invoice item. When all designated disputes have been raised for an invoice, the Supplier sends a 507C control Market Message to EBS Networks indicating the gross amount and number of all designated disputes raised on the current invoice. The *Market Message Implementation Guide – DUoS and Transaction Payments* contains instructions for sending 507 and 507C messages.

The Supplier withholds payment of the total amount of the disputed invoice items as reflected in the 507C control message. The gross amount for each invoice item is included in the *Detailed Transaction Charges* flat file.

Designated disputes will be resolved in a timeframe in accordance with the *Distribution Use of System Agreement*. EBS Networks will close the dispute only after confirming the resolution with the Supplier.

Upon resolution, designated disputes become due for payment in accordance with the *Distribution Use of System Agreement*. In the case of an accepted dispute, the next invoice and credit note that issue will include a reversal of the original disputed invoice item and a re-invoiced amount, where appropriate. The original gross amount of a denied designated dispute is due for payment.

5. The PSO Invoicing, Payment and Disputes Process

5.1 Overview of process

The PSO rate, be it PSO Levy or PSO Payment, is set by CRU. This results in ESB Networks invoicing or crediting a supplier on a monthly basis for the applicable PSO rate based on customers connected to the Distribution network and registered with that Supplier at the month end (in accordance with the CRU *PSO Invoicing and Collection Procedures*).

ESB Networks sends an invoice to the Supplier along with backing documentation. A credit note will issue where amounts are due to the supplier in relation to previous PSO periods. The Supplier makes full payment for any invoiced amount due via an EFT.

The following sections describe the process and documentation relating to PSO charges in more detail.

5.2 Invoicing

The documentation created at each instance of invoicing is as follows:

- PSO Invoice *
- PSO Adjustment Invoice *
- Detailed Backing Documentation **
- Adjustment Detailed Backing Documentation **
- Credit Note***

* PDF format

** Flat file format

***Will only issue when a credit is due to a supplier in relation to previous PSO periods.

This information is sent to the Supplier via SFTS / EE.

Each of these documents will be briefly explained below. Section 8 illustrates how each document should be interpreted using a number of invoicing scenarios.

PSO Invoice

This document is a VAT invoice that indicates the PSO Levy applicable to the Supplier for the month, per PSO category. The associated VAT is shown on a separate line.

The document indicates the due date, which is calculated in accordance with the *PSO Invoicing and Collection Procedures*.

PSO Adjustment Invoice

ESB Networks reviews a rolling four month history of PSO charges/payments at each month end. Any retrospective adjustments resulting from this review are reflected in this PSO Adjustment Invoice. The invoice indicates the adjustment charge per PSO category and per prior month.

This is also a VAT document and accordingly the associated VAT is shown on a separate line.

The document indicates the due date, which is calculated in accordance with the *PSO Invoicing and Collection Procedures*.

Detailed Backing Documentation

This flat file lists the MPRNs registered with the Supplier along with their associated PSO category. In the case of large customers (PSO3), the associated MIC is also included. Section 9 describes the format and content of this flat file in detail.

Adjustment Detailed Backing Documentation

This flat file has the same format and content as the above file. But as its purpose is to support the adjustment invoice (which retrospectively adjusts previous months' charges/payments), it also indicates whether each MPRN is an addition or reduction to the number of MPRNs registered with the Supplier. Section 9 describes the format and content of this flat file in detail.

Credit Note

The credit note is a VAT document which shows any credit due to the supplier in relation to previous PSO invoices.

The associated VAT is shown on a separate line.

5.3 Payment of PSO invoice by the suppliers

The Supplier makes full payment for the amount due via EFT by the due date. This due date is as defined in the *PSO Invoicing and Collection Procedures*. The Supplier <u>cannot</u> withhold payment for disputed invoice items.

5.4 PSO Payments from ESB Networks to suppliers

For PSO Payments ESB Networks makes the payment for the amount due via EFT in accordance with PSO Invoicing and Collection Procedures.

A supplier must provide bank details to ESB Networks in advance. Where a supplier requests a change of bank details at least 4 weeks' notice must be provided by the supplier to ESB Networks.

5.5 **PSO** Disputes

Upon receipt of the documentation via SFTS / EE , the Supplier validates the amount due to ESB Networks . As part of this process, the Supplier may dispute invoice items on the current invoice.

A Supplier may raise two types of disputes:

- Non Designated Disputes
- Designated Disputes

Designated disputes are defined in the *PSO Invoicing and Collection Procedures* as occurring when:

- there is an error in the information used for the calculation or an arithmetic error in the calculation of PSO Charge by the Company which is apparent on the face of the account and/or

All other dispute reasons are termed non-designated.

The Supplier notifies ESB Networks of disputes, whether designated or nondesignated via offline communication i.e. the Supplier <u>does not</u> communicate designated disputes to ESB Networks via a 507 market message.

ESB Networks will resolve the dispute in a timeframe in accordance with the PSO *Invoicing and Collection Procedures.*

The Supplier <u>cannot</u> withhold payment of a disputed amount, whether designated or non-designated, in accordance with the *PSO Invoicing and Collection Procedures*.

5.6 Application of the PSO levy for Commercial Storage

Application of the PSO levy for Commercial Storage Sites is addressed in WP0029 Procedure of Application of PSO for Commercial Storage Sites.

6. DUoS Invoicing, Payments and Disputes – Documentation

6.1 Overview

This section illustrates the documentation that a Supplier receives from ESB Networks and the documentation that must returned to ESB Networks over the course of a number of a DUoS invoicing scenarios. The purpose of the scenarios is to illustrate how the regular cyclical invoicing and payment process will work in possible scenarios.

Six scenarios of DUoS invoicing will be demonstrated. The events occurring in each scenario will be referenced to the relevant steps in *MPD 34 – DUoS, Transaction and PSO Payment Process* and to sample formats of the relevant documentation. The Six scenarios are as follows:

Scenario	Invoice Date	Timeframe	Scenario Feature
One	19	19 Jan - 2 Feb	Standard – no disputes
	January		
Two	3	3 Feb - 15 Feb	Non-designated dispute accepted
	February		
Three	16	16 Feb - 1 Mar	Two designated disputes raised
	February		
Four	2 March	2 Mar - 15 Mar	Designated disputes – one raised, two in progress
Five	16 March	16 Mar - 30 Mar	Designated disputes – one accepted, one denied, one in progress

As indicated in the above table, a scenario will cover the period of time between the issue of the current invoice and the issue of next invoice.

Note

- Dates, document numbers (i.e. invoice numbers etc) and monetary amounts are for illustrative purposes only.
- Volumes and types of consumption data are simplified to aid comprehension and are not intended to be representative of a typical Supplier.
- Template designs are subject to change.
- The example scenarios are for illustrative purposes only and do not preclude ESB Networks from following up for payments of overdue items outside of this regular process.

6.2 Scenario One

Role	Description	Exhibit ID	MPD Step
N	DUoS invoice is created to include MPRNs billed during the current period (example, 1 st to 15 th January).		1
N	All relevant invoicing documentation is issued to Supplier via SFTS / EE on 19 th January.	D1.1 to D1.6	2
S	Supplier receives documentation and validates amount due to ESB Networks.		3
S	Supplier identifies no invoice items in dispute.		4,11
S	Supplier sends a 507C control message to ESB Networks indicating that the gross amount and number of designated disputes are nil.	D1.7	12
S	Supplier updates the remittance advice by inserting the 507C message amount (in this case €0.00) and returns the advice to ESB Networks.	D1.8	14
S	Supplier makes full payment for amount due via EFT on due date, which in the example has been calculated as 2 nd February.		22
N	ESB Networks receives and ensures that the 507C message, remittance advice and EFT amounts reconcile.		13, 21, 23, 24, 25
N	Finally, ESB Networks processes the payment against the Supplier account.		26

The sequence of events in Scenario One is as follows:

N = ESB Networks ; S = Supplier

Key points or features are noted below each exhibit. Scenario one includes new columns for ToU as a result of MCR1223.

6.3 Scenario Two

Role	Description	Exhibit ID	MPD Step
N	DUoS invoice is created to include MPRNs billed during the current period (example , 16 th to 31 st January).		1
N	All relevant invoicing documentation is issued to Supplier via SFTS / EE on 3 rd February.	D2.1 to D2.6	2
S	Supplier receives documentation and validates amount due to ESB Networks.		3
S	Supplier notifies ESB Networks offline that there is one invoice item in dispute and that the dispute type is <i>non-designated</i> .	Highlighted in D2.3	4,5,15,
S	As there are no further disputes, the Supplier sends a 507C control message to ESB Networks indicating that the gross amount and number of <i>designated</i> disputes are nil.	D2.7	12
S	Supplier updates the remittance advice by inserting the 507C message amount (in this case €0.00) and returns the advice to ESB Networks.	D2.8	14
S	Supplier makes full payment for amount due via EFT on 15 th February (in advance of the due date, which in the example was calculated as 17 th February).		22
N	ESB Networks receives and ensures that the 507C message, remittance advice and EFT amounts reconcile.		13, 21, 23, 24, 25
N	ESB Networks processes the payment against the Supplier account.		26
N	ESB Networks investigates the non-designated dispute and resolves it in favour of the Supplier i.e. dispute is accepted.		17
N/S	ESB Networks confirms resolution of the dispute with the Supplier.		29, 30
N	ESB Networks performs necessary invoicing adjustments to reflect resolution of the dispute i.e. the original amount is reversed and the correct amount is re-invoiced. These adjustments will be reflected in the scenario three documentation.		31

The sequence of events in Scenario Two is as follows:

N = ESB Networks ; S = Supplier

Key points or features are noted below each exhibit.

6.4 Scenario Three

The sequence of events in Scenario Three is as follows:

Role	Description	Exhibit ID	MPD Step
N	DUoS invoice is created to include MPRNs billed during the current period (example, 1 st to 14 th February) and the re-invoiced amount of the accepted non-designated dispute. A credit note is created for the reversal of the original amount of the dispute.		1
N	All relevant invoicing documentation is issued to Supplier via SFTS / EE on 16 th February.	D3.1 to D3.8	2
S	Supplier receives documentation and validates amount due to ESB Networks.		3
S	Supplier identifies two designated disputes on the current invoice. The registration of the MPRN is being challenged in both cases.	Highlighted in D3.4	4,5
S	The Supplier sends a 507 message for each designated dispute.	D3.9,D3.10	6
S	As there are no further disputes, the Supplier sends a 507C control message to ESB Networks indicating that the gross amount of designated disputes is €499.55 and the number is two.	D3.11	12
S	Supplier updates the remittance advice by inserting the 507C message amount of €499.55 and returns the advice to ESB Networks.	D3.12	14
S	Supplier pays the amount due via EFT on due date, which in the example has been calculated as 2 nd March.		22
N	ESB Networks receives and ensures that the 507C message, remittance advice and EFT amounts reconcile.		13, 21, 23, 24, 25
N	ESB Networks processes the payment against the Supplier account.		26
Ν	ESB Networks investigates the two designated disputes. In the example, it is assumed that the disputes are not resolved before commencement of scenario four.		17

N = ESB Networks ; S = Supplier

Key points or features are noted below each exhibit.

6.5 Scenario Four

The sequence of events in Scenario Four is as follows:

Role	Description	Exhibit ID	MPD Step
N	DUoS invoice is created to include MPRNs billed during		1
	the current period (example, 15 th to 28 th February).		•
N	All relevant invoicing documentation is issued to Supplier via SFTS / EE on 2 nd March.	D4.1 to D4.7	2
S	Supplier receives documentation and validates amount due to ESB Networks.		3
S	Supplier identifies one designated dispute on the current invoice. The registration of MPRN is being challenged.	Highlighted in D4.3.	4,5
S	The Supplier sends a 507 message for the designated dispute.	D4.8	6
S	As there are no further disputes, the Supplier sends a 507C control message to ESB Networks indicating that the gross amount of designated disputes is €290.74 and the number is one.	D4.9	12
S	Supplier updates the remittance advice by inserting the 507C message amount of €290.74 and returns the advice to ESB Networks.	D4.10	14
S	Supplier pays the amount due via EFT on due date, which in the example has been calculated as 16 th March.		22
N	ESB Networks receives and ensures that the 507C message, remittance advice and EFT amounts reconcile.		13,, 21, 23, 24, 25
N	ESB Networks processes the payment against the Supplier account.		26
N	ESB Networks investigates the current designated dispute. In the example, it is assumed that the dispute is not resolved before the commencement of scenario five.		17
N/S	ESB Networks reaches a resolution on the two designated disputes raised in Scenario three, on invoice number 90000000003. One dispute is accepted, the other denied. ESB Networks confirms this with the Supplier		29, 30
N	ESB Networks performs necessary invoicing adjustments to reflect resolution of the accepted dispute i.e. the original amount is reversed and the correct amount is re-invoiced. These adjustments will be reflected in the scenario five documentation.		31

N = ESB Networks ; S = Supplier

Key points or features are noted below each exhibit.

6.6 **Scenario Five**

The sequence of events in Scenario Five is as follows:

Role	Description	Exhibit ID	MPD Step
N	DUoS invoice is created to include MPRNs billed during the current period (example, 1 st to 14 th March) and for the re-invoiced amount of the accepted designated dispute. A credit note is created for the reversed original amount of the dispute.		1
N	All relevant invoicing documentation is issued to Supplier via SFTS / EE on 16 th March.	D5.1 to D5.8	2
S	Supplier receives documentation and validates amount due to ESB Networks.		3
S S	Supplier decides no invoice items in dispute.		4,11
S	Supplier sends a 507C control message to ESB Networks indicating that the gross amount and number of designated disputes are nil.	D5.9	12
S	Supplier updates the remittance advice by inserting the 507C message amount (in this case €0.00) and returns the advice to ESB Networks.	D5.10	14
S	Supplier pays the amount due via EFT on due date, which in the example has been calculated as 30 th March.		22
N	ESB Networks receives and ensures that the 507C message, remittance advice and EFT amounts reconcile.		13,, 21, 23, 24, 25
N	ESB Networks processes the payment against the Supplier account.		26
N	ESB Networks is continuing to investigate the dispute raised in scenario four, on invoice number 9000000004. In the example, it is assumed that the dispute is not resolved before the commencement of the next scenario.		17

N = ESB Networks ; S = Supplier Key points or features are noted below each exhibit.

<u>Current Inv. /Resolved</u> <u>Desig. Dispute</u> C	<u>Invoice No.</u> 900000000004	MPRN Invoice Item No. See MPRN Invoice Item Detail	Invoice Amount 3,229.79	Control Message Amount 290.74	Payment Amount 2,939.05
Key:	Other cells are locke	ed		EFT Amount	2,939.05

Points to Note: This is the remittance advice as completed by the Supplier. The Supplier inserts the 507C message amount into the Control Message Amount cell, which automatically calculates the Payment Amount and EFT Amount. In the example, the Supplier is withholding payment of the gross amount of the designated dispute raised on the current invoice.

Points to Note: Two net amounts on invoice, one for current charges and a second line relating to the re-invoiced amount for the accepted designated dispute, which was raised by the Supplier in scenario three on invoice item number 10000000023000101. The reversal of the original amount disputes is included in the credit note in D5.2.

Points to Note: Disputes have been raised on two invoices. The disputes on invoice number 90000000003 have been resolved, one accepted and the other denied. The dispute on invoice number 90000000004 is still in progress at this point in time.

Supplier No:			SXX					
Contract Account No:			116000000001					
Address:			1 Any Street, Any	Town				
Invoice No.	Invoice Item No.	MPRN	Gross Amount	Dispute Type	Reason Code	Dispute Status	Raised On	Resolved On
		10099983690	247.73	DD	SNR	Accepted	20/02/2023	04/03/202
900000000003	100000000023000101	1009990.0090						
90000000003 90000000003	10000000023000101 10000000024000101	10099983691	251.82	DD	SNR	Denied	21/02/2023	05/03/202
				DD DD	SNR SNR	•	21/02/2023 07/03/2023	05/03/202

Points to Note: The report now shows that the two disputes on invoice number 90000000003 have been resolved – one accepted, one denied. The one dispute on invoice number 90000000004 is still in progress at this point in time.

Current Inv. (Decelved					
	<u>Invoice No.</u> 900000000005 90000000003	<u>MPRN</u> <u>Invoice Item No.</u> See MPRN Invoice Item Detail See Dispute Detail File	Invoice Amount 24,293.12 499.55	Control Message Amount	Payment Amount 24,293.12 499.55
Key:				EFT Amount	24,792.67

Points to Note: This is the remittance advice as sent to the Supplier. The amount due for payment relates to 3 items – (1) the net amount of the current invoice and credit note, (2) the accepted designated dispute and (3) the denied designated dispute. The remittance advice shows the original amount of the disputes as due for payment. For the denied designated dispute this is because the original amount was withheld by the Supplier and is now due for payment as the dispute is resolved.

In the case of the accepted designated dispute, the remittance advice also lists the original amount as due for payment. However the current amount due of \in 24,293.12 includes a reversal of accepted dispute amount (i.e. the credit note) and a re-invoiced amount (i.e. the adjustment debit charge on the invoice). Therefore the Supplier is paying:

Current DUoS Charges	€24,416.74
Re-invoiced Amount for Accepted Designated Dispute	€124.11
Credit Note for Accepted Designated Dispute	(€247.73)
Original Value of Accepted Designated Dispute	€247.73
Original Value of Denied Designated Dispute	<u>€251.82</u>
As per EFT amount	24,792.67

Key: Input by Supplier - All O	ther cells are locked]		EFT Amount	24,792.67

Points to Note: This is the remittance advice as completed by the Supplier. The Supplier inserts the 507C message amount into the Control Message Amount cell, which automatically calculates the Payment and EFT Amounts.

7 Transaction Invoicing, Payments and Disputes – Documentation

7.1 Overview

This section contains the documentation that a Supplier will receive from ESB Networks and the documentation that must be returned to ESB Networks over the course of a number of Transaction invoicing scenarios. The purpose of the scenarios is to illustrate how the regular cyclical invoicing and payment process will work in possible scenarios.

Four scenarios of Transaction invoicing will be demonstrated. The events occurring in each scenario will be referenced to the relevant steps in MPD 34 and to sample formats of the relevant documentation. The four scenarios are as follows:

Scenario	Invoice Date	Timeframe	Scenario Feature
One	2 February	2 Feb – 1 Mar	Non-designated dispute accepted
Two	2 March	2 Mar – 3 Apr	Two designated disputes raised
Three	4 April	4 Apr – 2 May	Designated disputes – one raised, two in progress
Four	3 May	3 May – 1 Jun	Designated disputes – one accepted, one denied, one in progress

As indicated in the above table, a scenario will cover the period of time from the issue of the current invoice to the issue of next invoice.

Note

- Dates, document numbers (i.e. invoice numbers etc) and monetary amounts are for illustrative purposes only.
- Volumes and types of consumption data are simplified to aid comprehension and are not intended to be representative of a typical Supplier.
- Template designs are subject to change.
- The example Scenarios are for illustrative purposes only and do not preclude ESB Networks from following up for payments of overdue items outside of this regular process.

7.2 Scenario One

Role	Description	Exhibit ID	MPD Step
N	Transaction invoice is created to include all service requests completed during the month (example, 1 st to 31 st January).		1
N	All relevant invoicing documentation is issued to Supplier via SFTS / EE on 2 nd February.	T1.1 to T1.5	2
S	Supplier receives documentation and validates amount due to ESB Networks.		3
S	Supplier notifies ESB Networks that there is one invoice item in dispute and that the dispute type is <i>non-designated</i> .	Highlighted in T1.2.	4,5,15
S	As there are no further disputes, the Supplier sends a 507C control message to ESB Networks indicating that gross amount and number of <i>designated disputes</i> are nil.	T1.6	11,12
S	Supplier updates the remittance advice by inserting the 507C message amount (in this case €0.00) and returns the advice to ESB Networks.	T1.7	14
S	Supplier makes full payment for amount due via EFT on due date, which in the example has been calculated as 16 th February.		22
N	ESB Networks receives and ensures that the 507C message, remittance advice and EFT amounts reconcile.		13, 21,23,24, 25
N	ESB Networks processes the payment against the Supplier account.		26
N	ESB Networks investigates the non-designated dispute and resolves it in favour of the Supplier.		17
N/S	ESB Networks confirms resolution of the dispute with the Supplier.		29/30
N	ESB Networks performs necessary invoicing adjustments to reflect resolution of the dispute i.e. original disputed amount is reversed and correct amount is re-invoiced. These adjustments will be reflected in the Scenario two documentation.		31

The sequence of events in Scenario One is as follows:

N = ESB Networks; S = Supplier

7.3 Scenario Two

The sequence of events in Scenario Two is as follows:

Role	Description	Exhibit ID	MPD Step
Ν	Transaction invoice is created to include all service requests completed during the month (example, 1 st to 28 th February) and corrected charge for accepted non-designated dispute. Credit note is created for reversal of original amount of dispute.		1
Ν	All relevant invoicing documentation is issued to Supplier via SFTS / EE on 2 nd March.	T2.1 to T2.7	2
S	Supplier receives documentation and validates amount due to ESB Networks.		3
S	Supplier identifies two designated disputes on the current invoice. The registration of the MPRN is being challenged in both cases.	Highlighted in T2.3.	4,5
S	The Supplier sends a 507 message for <u>each</u> designated dispute.	T2.8,T2.9	6
S	As there are no further disputes, the Supplier sends a 507C control message to ESB Networks indicating the gross amount of designated disputes as €372.28 and the number as two.	T2.10	12
S	Supplier updates the remittance advice by inserting the 507C message amount of €372.28 and returns the advice to ESB Networks.	T2.11	14
S	Supplier pays the amount due via EFT on due date, which in the example has been calculated as 16 th March.		22
N	ESB Networks receives and confirms that the 507C message, remittance advice and EFT amounts reconcile.		13, 21, 23, 24, 25
Ν	ESB Networks processes the payment against the Supplier account.		26
Ν	ESB Networks investigates the two designated disputes. In the example, it is assumed that the disputes are not resolved before commencement of Scenario three.		17

N = ESB Networks; S = Supplier

7.4 Scenario Three

The sequence of events in Scenario Three is as follows:

Role	Description	Exhibit ID	MPD Step
Ν	Transaction invoice is created to include all service requests completed during the month (example, 1 st to 31 st March).		1
N	All relevant invoicing documentation is issued to Supplier via SFTS / EE on 4 th April.	T3.1 to T3.6	2
S	Supplier receives documentation and validates amount due to ESB Networks.		3
S	Supplier identifies one designated dispute on the current invoice. The registration of the MPRN is being challenged.	Highlighted in T3.2.	4,5
S	The Supplier sends a 507 message for the designated dispute.	T3.7	6
S	As there are no further disputes, the Supplier sends a 507C control message to ESB Networks indicating that the gross amount of designated disputes as €120.31 and the number as one.	T3.8	12
S	Supplier updates the remittance advice by inserting the 507C message amount of €120.31 and returns the advice to ESB Networks.	T3.9	14
S	Supplier pays the amount due via EFT on due date, which in the example has been calculated as 18 th April.		22
Ν	ESB Networks receives and confirms that the 507C message, remittance advice and EFT amounts reconcile.		13, 21, 23, 24, 25
N	ESB Networks processes the payment against the Supplier account.		26
N	ESB Networks investigates the current designated dispute In the example, it is assumed that this dispute is not resolved before the commencement of Scenario four.		17
N/S	ESB Networks reaches a resolution on the two designated disputes raised on invoice number 900000623. One dispute is accepted, the other denied. ESB Networks confirms this with the Supplier		29, 30
N	ESB Networks performs necessary invoicing adjustments to reflect resolution of the accepted dispute i.e. the original disputed amount is reversed. No amount is re-invoiced as the MPRN is not registered with the Supplier and therefore the charge does not apply. These adjustments will be reflected in the Scenario four documentation.		31

N = ESB Networks; S = Supplier

7.5 Scenario Four

Role	Description	Exhibit ID	MPD Step
N	Transaction invoice is created to include all service requests completed during the month (example, 1 st to 29 th April). A credit note is created for reversal of original amount of accepted designated dispute.		1
Ν	All relevant invoicing documentation is issued to Supplier via SFTS / EE on 3 rd May.	T4.1 to T4.7	2
S	Supplier receives documentation and validates amount due to ESB Networks.		3
S	Supplier decides that there are no invoice items in dispute.		4,11
S	Supplier sends a 507C control message to ESB Networks indicating that the gross amount and number of designated disputes are nil.	T4.8	12
S	Supplier updates the remittance advice by inserting the 507C message amount (in this case €0.00) and returns the advice to ESB Networks.	T4.9	14
S	Supplier pays the amount due via EFT on due date, which in the example has been calculated as 17 th May.		22
N	ESB Networks receives and ensures that the 507C message, remittance advice and EFT amounts reconcile.		13, 21, 23, 24, 25
Ν	ESB Networks processes the payment against the Supplier account.		26
N	ESB Networks is continuing to investigate the designated dispute on invoice number 900000675. In the example, it is assumed that the dispute is not resolved for the commencement of the next Scenario.		17

N = ESB Networks; S = Supplier

Control Total	1021.52					
End of File						

Points to Note:

(1) Control total of \in 1,021.52 agrees to gross invoice amount (T1.1).

(2) Sum of net amounts agrees to net invoice amount (T1.1).

(3) The above exhibit is for illustration purposes only. The flat file will not contain any row headings etc. Section 9 of this document contains guidelines for using this flat file.

(4) The Market Participant Business Reference may be quoted by the Supplier upon requesting the service. Otherwise the field will remain blank.

(5) The recipient ID is the same as the Supplier Number, in the example SXX.

(6) The item highlighted in green is the non-designated dispute raised by the Supplier.

Transaction Statement of Account Date: 01/01/05 to 02/02/05

Supplier No: Contract Accor Address:	unt No:	SXX 11600000003 1 Any Street, Any Town

Points to Note: This is the remittance advice as completed by the Supplier. The Supplier inserts the 507C message amount into the Control Message Amount cell, which automatically calculates the Payment Amount and EFT Amount.

8 **PSO Invoicing, Payments and Disputes - Documentation**

8.1 Overview

This section illustrates the documentation that a Supplier will receive from ESB Networks over the course of a number of a PSO invoicing scenarios. The purpose of the scenarios is to illustrate how the payment process will work in possible scenarios.

Three scenarios of PSO invoicing will be demonstrated. The events occurring in each scenario will be referenced to the relevant steps in MPD 34 and to sample formats of the relevant documentation. The three scenarios are as follows:

Scenario	Invoice Date	Timeframe	Scenario Feature
One	2 February	2 Feb – 1 Mar	Standard
Two	2 March	2 Mar – 3 Apr	Adjustment to previous month invoice
Three	2 March	2 Mar – 3 Apr	PSO Payment

As indicated in the above table, a scenario will cover the period of time from the issue of the current invoice to the issue of next invoice.

Note:

- Dates, document numbers (i.e. invoice numbers etc) and monetary amounts are for illustrative purposes only.
- Volumes and types of consumption data are simplified to aid comprehension and are not intended to be representative of a typical Supplier.
- Template designs are subject to change.

8.2 Scenario One

The sequence of events in Scenario One is as follows:

Role	Description	Exhibit ID	MPD Step
N	PSO Levy for January is calculated and an invoice is created. This along with backing documentation is issued to Supplier on 2 nd February via SFTS / EE.	P1.1,P1.2	18
S	Supplier receives documentation and processes information.		19
S	Supplier makes full payment for amount due via EFT on due date, which in the example has been calculated as 16 th February.		22
Ν	Finally, ESB Networks processes the payment against the Supplier account.		21, 23, 26

N = ESB Networks; S = Supplier

Scenario. Key points or features are noted below each exhibit.

8.3 Scenario Two

The sequence of events in Scenario Two is as follows:

Role	Description	Exhibit ID	MPD Step
N	PSO Levy for February is calculated and an invoice is created. ESB Networks reviews the PSO Levy for January and finds that an amendment is required. An adjustment invoice is created to reflect this.		
Ν	Both invoices and backing documentation are issued to Supplier on 2 nd March via SFTS / EE	P2.1 to P2.4	18
S	Supplier receives documentation and processes information.		19
S	Supplier makes full payment for amount due via EFT on due date, which in the example has been calculated as 16 th March.		22
Ν	Finally, ESB Networks processes the payment against the Supplier account.		21, 23 ,26

N = ESB Networks; S = Supplier

Scenario Key points or features are noted below each exhibit.

8.4 Scenario Three

In this scenario the CRU has determined that a PSO Payment will apply and therefore credit is due to the supplier in relation to previous PSO periods. The sequence of events in Scenario Three is as follows:

Role	Description	Exhibit ID	MPD Step
N	PSO Payment for October is calculated and a credit note is created. This along with backing documentation is issued to Supplier via SFTS / EE.	P3.1,	18
S	Supplier receives documentation and processes information.		19
Ν	ESBN makes payment for amount due via EFT.		32

N = ESB Networks; S = Supplier

Key points or features are noted below each exhibit.

9 DUoS/Transaction/PSO Flat File Formats

9.1 Introduction

Purpose of the File Format Document

This document provides information to assist Suppliers in the interpretation of files provided as detail for

- Distribution Use of System (DUOS) Charges
- Transactional Charges
- PSO Rates
- DUoS and Transaction Disputes

The document includes technical information on the data definition of the flat files.

Market messages 507 and 507c are not detailed here. These market messages are documented in "Market Messages Implementation Guide - DUoS and Transaction Payments"

Technical Overview

Flat file information will be provided to Market Participants via SFTS / EE as part of a package of information delivered on a twice monthly basis for DUoS and once a month for Transaction and PSO.

9.2 File Data Formats

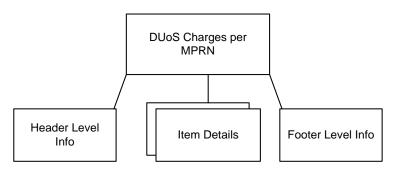

9.2.1 MPRN Level Invoice Item Detail – Flat File

The MPRN Level Invoice Item Detail file is sent by ESB Networks to Market Registered Suppliers to provide detailed information on the DUoS Invoice/Credit Note.

The file will be provided to the Supplier as part of a package of information related to a DUOS Invoice and Credit Note. The other documents will include:

- DUoS Group Summary
- Account Statement
- Dispute Summary
- Dispute Detail
- Remittance Advice

File Data Hierarchy Diagram

File Naming Standard

The file naming standard will be: DUOS_<Invoice Number>_<SenderID>_<RecipientID>_<TimeStamp-Date&Time>.csv Where TimeStamp is in the format: YYYYMMDDHHMMSS

e.g. DUOS_9000000012_DSO_SXX_20050101105500.csv

The invoice number will be the same as that included on the Supplier's printed Invoice, Credit Note and the DUoS Group Summary.

File Structure

This section describes the structure of the DUoS flat file. The purpose of the file segments and data items are explained and any rules for composition outlined.

Segm	Segment and Field Level Identifier		Segment and Field Level Identifier Rpt Optionality Field Size Description / Purpose and composition instruct					
1 Message Header		1	Mandatory		This is the Header information provided for each flat file record. This header segment is unique to the flat file.			
2	FLD	Segment ID	1	Mandatory	NUM(1)	This is an identifier to categorise the level in the file 1 = Header Record (1 record only) 2 = Item Detail Record (1n records) 3 = Footer Record (1 record only)		
2	FLD	Invoice Number	1	Mandatory	AN(12)	This is a unique number that references the Invoice/Credit Note information being provided.		
2	FLD	Sender ID	1	Mandatory	AN(3)	This is the Unique identifier of the Market Participant Sending the message. For ESB Networks this is DSO.		
2	FLD	Recipient ID	1	Mandatory	AN(3)	This is the Unique identifier of the Market Participant receiving the message. This code will correspond with the Supplier ID for the Supplier Registered on the MPRN's.		
2	FLD	Time Stamp	1	Mandatory	AN(14)	This is a time and date stamp indicating the time and date that the file was created. This is defined as: • YYYYMMDDHHMMSS		
1 Iter	n Detail	S	1 N			This contains information relating to each item in the invoice.		
2	FLD	Segment ID	1	Mandatory	NUM(1)	This is an identifier to categorise the level in the file 1 = Header Record (1 record only) 2 = Item Detail Record (1n records) 3 = Footer Record (1 record only)		
2	FLD	Invoice Number	1	Mandatory	AN(12)	This is a ID of the Invoice/Credit Note that the item relates to.		
2	FLD	Invoice Item Number	1	Mandatory	NUM(18)	This is a unique reference to an invoice item in a file. This number can be used to reference which item(s) are being disputed in a 507 message.		
2	FLD	MPRN	1	Mandatory	AN(11)	The unique identifying reference number for the Meter Point. All elements of MPRN will be provided.		

2	FLD	Adjustment Reference	1	Optional	NUM(18)	Only shown where the entry relates to a reversal of a previous invoice. The adjustment reference is the invoice item number of the original entry.
2	FLD	Invoice Type	1	Mandatory	AN(2)	Code used to identify the type of invoice itemValid codes for the invoice type field are:1SNew Charge - Sequential Bill2SAdjustment Credit - Reversal of Sequential bill2CAdjustment Credit - Non-sequential bill credit2DAdjustment Credit - Reversal of non-sequential billcharge3S3SAdjustment Debit - Reversal of non-sequential bill3CAdjustment Debit - Reversal of non-sequential bill3DAdjustment Debit - Non-sequential bill charge
2	FLD	DUOS Group	1	Mandatory	AN(4)	DUOS Group is a code which denotes to the use of system tariff applying to the MPRN provided in the item.
2	FLD	Billing Date From	1	Mandatory	AN(8)	The date from which the billing period for the item became effective. In format: • YYYYMMDD
2	FLD	Billing Date To	1	Mandatory	AN(8)	The date to which the billing period for the item was effective. In format: • YYYYMMDD
2	FLD	Day kWh Consumption	1	Optional	NUM(15,3)	This is the Day Rate Energy consumption recorded in kWh for the billing period.
2	FLD	Day Energy Charge	1	Optional	NUM(13,2)	This is the Energy charge associated to day consumption if applicable, for the billing period.
2	FLD	Night kWh Consumption	1	Optional	NUM(15,2)	This is the Night Rate Energy consumption recorded in kWh for the billing period.
2	FLD	Night Energy Charge	1	Optional	NUM(13,2)	Energy charge associated to night consumption, for the billing period.
2	FLD	24 Hr kWh Consumption	1	Optional	NUM(15,2)	The 24 Hr energy consumption recorded in kWh for the billing period.
2	FLD	24 Hr Energy Charge	1	Optional	NUM(13,2)	Energy charge associated to 24 Hr consumption, for the billing period.

2	FLD	Standing Charge	1	Optional	NUM(13,2)	This is a time based charge calculated per customer, for the billing period.
2	FLD	Capacity Charge	1	Optional	NUM(13,2)	This is a standing charge per kVA per month for agreed MIC, for the billing period
2	FLD	Maximum Import Capacity	1	Optional	NUM(16,7)	Maximum Import Capacity is the capacity in kVA agreed in the connection agreement and permitted to be imported at a meter point.
2	FLD	Max kVA	1	Optional	NUM(15,3)	This is the recorded max kVA for the MPRN during the billing period.
2	FLD	MIC Surcharge	1	Optional	NUM(13,2)	This is a Surcharge applied when a customer exceeds an agreed MIC, for the billing period.
2	FLD	Reactive Energy (kVarh)	1	Optional	NUM(15,2)	This is recorded reactive energy in kVarh, for the billing period.
2	FLD	Power Factor Surcharge	1	Optional	NUM(13,2)	This is a surcharge applied where kVarh exceeds one third of KWH where appropriate.
2	FLD	Day Off Peak kWh	1	Optional	NUM(15,2)	This is the Day Off Peak energy consumption recorded in kWh from 8.00hrs to 23.00hrs (excluding peak) for the billing period,
2	FLD	Day Off Peak Charge	1	Optional	NUM(15,2)	This is the Energy charge associated to Day Off Peak consumption if applicable, for the billing period
2	FLD	Night Off Peak kWh	1	Optional	NUM(15,2)	This is the Night Rate Energy consumption recorded in kWh from 23.00hrs to 8.00hrs for the billing period.
2	FLD	Night Off Peak Charge	1	Optional	NUM(15,2)	Energy charge associated to Night Off Peak consumption, for the billing period.
2	FLD	Peak kWh	1	Optional	NUM(13,2)	This is the Peak energy consumption recorded in kWh from 17.00hrs to 19.00hrs for the billing period
2	FLD	Peak Charge	1	Optional	NUM(13,2)	Energy charge associated to Peak consumption for the billing period.
2	FLD	QH Day Off Peak kWh	1	Optional	NUM(15,2)	This is the QH Day Off Peak energy consumption recorded in kWh from 8.00hrs to 23.00hrs (excluding peak) for the billing period,
2	FLD	QH Day Off Peak Charge	1	Optional	NUM(13,2)	This is the Energy charge associated to QH Day Off Peak consumption if applicable, for the billing period

2	FLD	QH Night Off Peak kWh	1	Optional	NUM(15,2)	This is the QH Night Rate Energy consumption recorded in kWh from 23.00hrs to 8.00hrs for the billing period.
2	FLD	QH Day Off Peak Charge	1	Optional	NUM(13,2)	Energy charge associated to QH Night Off Peak consumption for the billing period.
2	FLD	QH Peak kWh	1	Optional	NUM(13,2)	This is the QH Peak energy consumption recorded in kWh from 17.00hrs to 19.00hrs for the billing period
2	FLD	QH Peak Charge	1	Optional	NUM(13,2)	Energy charge associated to QH Peak consumption for the billing period.
2	FLD	Net Amount	1	Mandatory	NUM(13,2)	Total Net Amount for the Invoice Item specified. Does not include VAT.
2	FLD	Gross Amount	1	Mandatory	NUM(13,2)	Total Gross Amount for the Invoice Item specified i.e. the Net Amount and a distribution of the associated VAT. Note: because VAT is calculated at the aggregate invoice/credit note level, the apportioning of VAT at the MPRN level to determine the Gross values may have minor rounding differences. This is the gross amount to be withheld in case of a designated dispute.
1 Foot	er		1			This item denotes the end of the particular flat file provided and control information on the number of records and total amounts.
2	FLD	Segment ID	1	Mandatory	NUM(1)	This is an identifier to categorise the level in the file 1 = Header Record (1 record only) 2 = Item Detail Record (1n records) 3 = Footer Record (1 record only)
2	FLD	Total Records	1	Mandatory	NUM(9)	The total number of invoice items in the file, excluding the header and footer line. This should equal the total number of records shown in the Summary by DUoS Group Report
2	FLD	Control Total	1	Mandatory	NUM(13,2)	Summation of all <u>Net</u> Amounts shown in the detailed file. This should equal the total amount shown in the DUoS Group Summary.

Additional File Details

- The file data will be comma delimited.
- The field size shown is the maximum permissible; if the data is smaller in size than the field maximum then <u>no</u> placeholders will be used. e.g. the invoice number is supplied as 9000001 not 0000090000001.
- Placeholders after the decimal point will always be provided e.g. 12.000 not 12
- Field sizes shown do not include allowance for decimal points, these will add one further character to each field if used. e.g. NUM(3,2) = 123.45
- Negative signs will be shown after the value e.g. 130.000- and are not included in the maximum size values above.
- If no values exist for a given field then the value will be blank i.e.. ...,... not ...,0.000,...

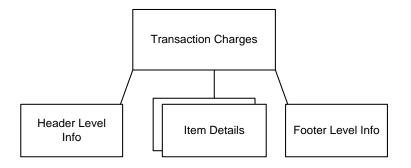

9.2.2 Detailed Transaction Charges – Flat File

The detailed transaction charges file is sent by ESB Networks to Market Registered Suppliers to provide detailed information on the Transaction Invoice/ Credit Note.

The file will be provided to the Supplier as part of a package of information related to the Transaction Invoice and Credit Note. The other documents will include:

- Account Statement
- Dispute Summary
- Dispute Detail
- Remittance Advice

File Data Hierarchy Diagram

File Naming Standard

The file naming standard will be: TRANSACTION_<Invoice Number>_DSO_< Recipient ID >_<TimeStamp-Date&Time>.csv Where TimeStamp is in the format: YYYYMMDDHHMMSS

e.g. TRANSACTION_ 90000057 _DSO_ SXX_20050101105500.csv

The invoice number will be the same as that included on the Supplier's printed transaction invoice.

File Structure

This section describes the structure of the transaction flat file. The purpose of the file segments and data items are explained and any rules for composition outlined.

Segm	Segment and Field Level Identifier		Rpt	Optionality	Field Size	Description / Purpose and composition instructions
1 Me	ssage ⊦	leader	1	Mandatory		This is the Header information provided for each flat file record. This header segment is unique to the flat file.
2	FLD	Segment ID	1	Mandatory	NUM(1)	This is an identifier to categorise the level in the file 1 = Header Record (1 record only) 2 = Item Detail Record (1n records) 3 = Footer Record (1 record only)
2	FLD	Invoice Number	1	Mandatory	AN(12)	This is a unique number that references the Invoice Number or Credit Note.
2	FLD	From date	1	Mandatory	DATE(10)	From date is the earliest date of an invoice item.
2	FLD	To date		Mandatory	DATE(10)	To date is latest date of an invoice item.
2	FLD	Sender ID	1	Mandatory	AN(3)	This is the Unique identifier of the Market Participant Sending the message. For ESB Networks this is DSO.
2	FLD	Recipient ID	1	Mandatory	AN(3)	This is the Unique identifier of the Market Participant receiving the message. This code will correspond with the Supplier ID for the Supplier Registered on the MPRN's.
2	FLD	Time Stamp	1	Mandatory	AN(14)	This is a time and date stamp indicating the time and date that the file was created. This is defined as:

						YYYYMMDDHHMMSS
1 Iter	n Detail	S	1 N			This contains information relating to each item in the record.
2	FLD	Segment ID	1	Mandatory	NUM(1)	This is an identifier to categorise the level in the file 1 = Header Record (1 record only) 2 = Item Detail Record (1n records) 3 = Footer Record (1 record only)
2	FLD	Invoice Item Number	1	Mandatory	NUM(10)	This is the unique individual invoice item number applicable to the transaction charge.
2	FLD	Market Participant Business Reference	1	Optional	Num(20)	This is the unique number that the Supplier may give as their reference for the particular transaction. Otherwise, this field will remain blank.
2	FLD	Transaction Charge Description	1	Mandatory	Char_20)	This a description of the invoice item e.g. MRSO, Revenue Protection. Where the invoice item relates to a charge for meter works, a more detailed description is given e.g. re- energise, de-energise etc.
2	FLD	MPRN	1	Mandatory	Num(11)	The unique identifying reference number for the Meter Point. All elements of MPRN will be provided.
2	FLD	Net Amount	1	Mandatory	Num(13,2)	The net amount of the individual transaction
2	FLD	Vat Amount	1	Mandatory	Num(13,2)	The VAT amount of the individual transaction
2	FLD	Gross Amount	1	Mandatory	Num(13,2)	The gross amount of the individual transaction. This is the amount to be withheld in case of a designated dispute.
1 Foot	er					This item denotes the end of the particular flat file provided and control information on the number of records and total amounts.
2	FLD	Segment ID	1	Mandatory	NUM(1)	This is an identifier to categorise the level in the file 1 = Header Record (1 record only) 2 = Item Detail Record (1n records) 3 = Footer Record (1 record only)
2	FLD	Total Records	1	Mandatory	NUM(9)	The total number of invoice items in the file, excluding the header and footer line.
2	FLD	Control Total	1	Mandatory	NUM(13,2)	Summation of all <u>gross</u> amounts shown in the detailed file. This should equal the sum of gross amounts shown in the Invoice and Credit Note.

Example of File Data

1,900000057,20040301,20040331,DSO,SXX,20050212212053 2,3200000205,789532565,10000000155,200.00,27.00,227.00 2,3200000204,789532568,10000000154,100.00,13.50,113.50 2,3200000203,789532569,10000000150,158.00,21.33,179.33 2,3200000202,789532570,10000000151,158.00,21.33,179.33 3,4,699.16

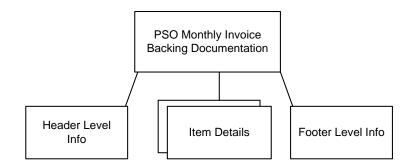

Additional File Details

- The file data will be comma delimited.
- The field size shown is the maximum permissible; if the data is smaller in size than the field maximum then <u>no</u> placeholders will be used. e.g. the invoice number is supplied as 9000001 not 0000090000001.
- Placeholders after the decimal point will always be provided e.g. 12.000 not 12
- Field sizes shown do not include allowance for decimal points, these will add one further character to each field if used. e.g. NUM(3,2) = 123.45
- Negative signs will be shown after the value e.g. 130.000- and are not included in the maximum size values above.

9.2.3 PSO Invoice Detailed Backing Documentation – Flat File

This file will be provided by ESB Networks to each Market Registered Supplier as backing documentation for PSO invoices or PSO Credit Notes where applicable. One file will be produced per supplier per month. The file will contain detailed information in respect of every MPRN, registered to the Market Registered Supplier, that attracted a PSO Levy or PSO Payment.

File Data Hierarchy Diagram

File Naming Standard

The file naming standard will be: PSO_Monthly_<Month End Date>_<SenderID>_<RecipientID>_<TimeStamp-Date&Time>.csv Month End Date is in the format: YYYYMMDD TimeStamp is in the format: YYYYMMDDHHMMSS

e.g. PSO_Monthly_20050101_DSO_SXX_20050101105500.csv

File Structure

This section describes the structure of the PSO flat file. The purpose of the file segments and data items are explained and any rules for composition outlined.

1 Me	ssage H	leader	1	Mandatory		This is the Header information provided for each flat file record. This header segment is unique to the flat file.
2	FLD	Segment ID	1	Mandatory	NUM(1)	This is an identifier to categorise the level in the file 1 = Header Record (1 record only) 2 = Item Detail Record (1n records) 3 = Footer Record (1 record only)
2	FLD	Sender ID	1	Mandatory	AN(3)	This is the Unique identifier of the Market Participant Sending the message. For ESB Networks this is DSO
2	FLD	Recipient ID	1	Mandatory	AN(3)	This is the Unique identifier of the Market Participant receiving the message. This code will correspond with the Supplier ID for the Supplier Registered on the MPRN's.
2	FLD	Time Stamp	1	Mandatory	AN(14)	This is a time and date stamp indicating the time and date that the file was created. This is in the format YYYYMMDDHHMMSS
2	FLD	Month End Date	1	Mandatory	AN(8)	The month end date of the associated PSO invoice in the format YYYYMMDD
1 Iter	1 Item Details		1 N			A detail record will be provided containing information relating to each MPRN that attracted a PSO charge in the month end period contained in the Header record.
2	FLD	Segment ID	1	Mandatory	NUM(1)	This is an identifier to categorise the level in the file 1 = Header Record (1 record only) 2 = Item Detail Record (1n records) 3 = Footer Record (1 record only)
2	FLD	MPRN	1	Mandatory	AN(11)	The unique identifying reference number for the Meter Point. All elements of MPRN will be provided.
2	FLD	PSO Classification	1	Mandatory	AN(4)	This identifies the PSO Classification relevant to the MPRN and is in the format PSOn where n can equal 1, 2 or 3.
2	FLD	MIC	1	Optional	NUM(16,7)	Maximum Import Capacity is the capacity in kVA agreed in the connection agreement and permitted to be imported at a meter point.
1 Foot	1 Footer		1			This item denotes the end of the particular flat file provided and control information on the number of records.
2	FLD	Segment ID	1	Mandatory	NUM(1)	This is an identifier to categorise the level in the file 1 = Header Record (1 record only)

						2 = Item Detail Record (1n records) 3 = Footer Record (1 record only)
2	FLD	Total Records	1	Mandatory	NUM(9)	The total number of detail records in the file, excluding the header and footer line.

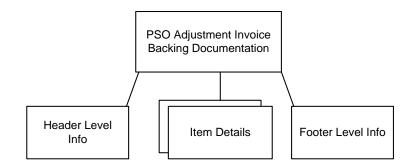

Additional File Details

- The file data will be comma delimited.
- The field size shown is the maximum permissible; if the data is smaller in size than the field maximum then <u>no</u> placeholders will be used. e.g. the invoice number is supplied as 9000001 not 0000090000001.
- Placeholders after the decimal point will always be provided e.g. 12.000 not 12
- Field sizes shown do not include allowance for decimal points, these will add one further character to each field if used. e.g. NUM(3,2) = 123.45
- Negative signs will be shown after the value e.g. 130.000- and are not included in the maximum size values above.
- If no values exist for a given field then the value will be blank i.e.. ...,... not ...,0.000,...

9.2.4 PSO Adjustment Invoice Detailed Backing Documentation - Flat File

This file will be provided by ESB Networks to each Market Registered Supplier as backing documentation for PSO Adjustment Invoices. One file will be produced per supplier per month end date for which there are adjustments. Each file will contain detailed information in respect of every MPRN, registered to the Market Registered Supplier that attracted a PSO adjustment.

File Data Hierarchy Diagram

File Naming Standard

The file naming standard will be: PSO_Adjustment_<Month End Date>_<SenderID>_<RecipientID>_<TimeStamp-Date&Time>.csv Month End Date is in the format: YYYYMMDD TimeStamp is in the format: YYYYMMDDHHMMSS

e.g. PSO_Adjustment_20050101_DSO_SXX_20050101105500.csv

File Structure

This section describes the structure of the PSO flat file. The purpose of the file segments and data items are explained and any rules for composition outlined.

Segm	Segment and Field Level Identifier			Optionality	Field Size	Description / Purpose and composition instructions
1 Message Header		1	Mandatory		This is the Header information provided for each flat file record. This header segment is unique to the flat file.	
2	FLD	Segment ID	1	Mandatory	NUM(1)	This is an identifier to categorise the level in the file 1 = Header Record (1 record only) 2 = Item Detail Record (1n records) 3 = Footer Record (1 record only)
2	FLD	Sender ID	1	Mandatory	AN(3)	This is the Unique identifier of the Market Participant Sending the message. For ESB Networks this is DSO
2	FLD	Recipient ID	1	Mandatory	AN(3)	This is the Unique identifier of the Market Participant receiving the message. This code will correspond with the Supplier ID for the Supplier registered on the MPRN's.
2	FLD	Time Stamp	1	Mandatory	AN(14)	This is a time and date stamp indicating the time and date that the file was created. This is in the format YYYYMMDDHHMMSS
2	FLD	Month End Date	1	Mandatory	AN(8)	The month end date of the associated PSO invoice in the format YYYYMMDD
1 Iter	1 Item Details		1 N			A detail record will be provided containing information relating to each MPRN that attracted a PSO adjustment charge in the month end period contained in the Header record.
2	FLD	Segment ID	1	Mandatory	NUM(1)	This is an identifier to categorise the level in the file 1 = Header Record (1 record only) 2 = Item Detail Record (1n records) 3 = Footer Record (1 record only)
2	FLD	Adjustment Type	1	Mandatory	A(1)	Identifies the type of adjustment – "A" = Additional "D" = Deletion
2	FLD	MPRN	1	Mandatory	AN(11)	The unique identifying reference number for the Meter Point. All elements of MPRN will be provided.
2	FLD	PSO Classification	1	Mandatory	AN(4)	This identifies the PSO Classification relevant to the MPRN and is in the format PSOn where n can equal 1, 2 or 3.
2	FLD	MIC	1	Optional	NUM(16,7)	Maximum Import Capacity is the capacity in kVA agreed in the connection agreement and permitted to be imported at a meter point.

1 Foot	er		1			This item denotes the end of the particular flat file provided and control information on the number of records.
2	FLD	Segment ID	1	Mandatory	NUM(1)	This is an identifier to categorise the level in the file 1 = Header Record (1 record only) 2 = Item Detail Record (1n records) 3 = Footer Record (1 record only)
2	FLD	Total Records	1	Mandatory	NUM(9)	The total number of detail records in the file, excluding the header and footer line.

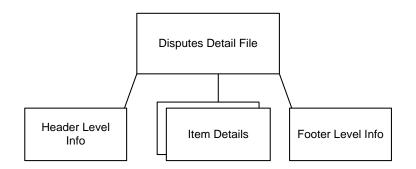

Additional File Details

- The file data will be comma delimited.
- The field size shown is the maximum permissible; if the data is smaller in size than the field maximum then <u>no</u> placeholders will be used. e.g. the invoice number is supplied as 9000001 not 0000090000001.
- Placeholders after the decimal point will always be provided e.g. 12.000 not 12
- Field sizes shown do not include allowance for decimal points, these will add one further character to each field if used. e.g. NUM(3,2) = 123.45
- Negative signs will be shown after the value e.g. 130.000- and are not included in the maximum size values above.
- If no values exist for a given field then the value will be blank i.e.. ...,... not ...,0.000,...

9.2.5 Dispute Detail – Flat File

The dispute detail file will be sent by ESB Networks to each Market Registered Supplier to provide detailed information on disputes raised by the Supplier on DUoS and Transaction invoices. The file will be provided to Suppliers via SFTS / EE as part of a package of information related to DUoS or Transaction charges.

File Data Hierarchy Diagram

File Naming Standard

The file naming standard will be:

For DUoS disputes: DUoS_<SenderID>_<RecipientID>_<TimeStamp-Date&Time>.csv E.g. DUoS_DSO_SXX_20050101105500.csv

For Transaction disputes: TRANSACTION_<SenderID>_<RecipientID>_<TimeStamp-Date&Time>.csv E.g. TRANSACTION_DSO_SXX_20050101105500.csv

File Structure

This section describes the structure of the Dispute Detail flat file. The purpose of the file segments and data item are explained and any rules for composition outlined.

Segment and Field Level Identifier 1 Message Header			Rpt	Optionality Mandatory	Field Size	Description / Purpose and composition instructions This is the Header information provided for each flat file record. This header segment is unique to the flat file.
			1			
2	FLD	Segment ID	1	Mandatory	NUM(1)	This is an identifier to categorise the level in the file 1 = Header Record (1 record only) 2 = Item Detail Record (1n records) 3 = Footer Record (1 record only)
2	FLD	Sender ID	1	Mandatory	AN(3)	This is the Unique identifier of the Market Participant Sending the message. For ESB Networks this is DSO
2	FLD	Recipient ID	1	Mandatory	AN(3)	This is the Unique identifier of the Market Participant receiving the message. This code will correspond with the Supplier ID for the Supplier Registered on the MPRN's.
2	FLD	From Date	1	Mandatory	AN(8)	From date is the date of the last account statement / dispute summary.
2	FLD	To Date	1	Mandatory	AN(8)	To date is the date of the current account statement / dispute summary.
2	FLD	Time Stamp	1	Mandatory	AN(14)	This is a time and date stamp indicating the time and date that the file was created. This is in the format YYYYMDDHHMMSS
1 Iter	1 Item Details		1 N			A detail record will be provided containing information relating to each MPRN that attracted a PSO adjustment charge in the month end period contained in the Header record.
2	FLD	Segment ID	1	Mandatory	NUM(1)	This is an identifier to categorise the level in the file 1 = Header Record (1 record only) 2 = Item Detail Record (1n records) 3 = Footer Record (1 record only)
2	FLD	Invoice Number	1	Mandatory	AN(12)	This is a unique number that references the Invoice Number.
2	FLD	Invoice Item Number	1	Mandatory	NUM(10)	This is the unique individual invoice item number applicable to the DUoS or transaction charge.

2	FLD	MPRN	1	Mandatory	AN(11)	The unique identifying reference number for the Meter Point. All elements of MPRN will be provided.
2	FLD	Market Participant Business Reference	1	Optional	Num(20)	This is the unique number that the Supplier may give as their reference for the particular transaction invoice item. Otherwise, this field will remain blank.
2	FLD	Gross Amount	1	Mandatory	Num(13,2)	The gross amount of the individual invoice item.
2	FLD	Dispute Type	1	Mandatory	AN(2)	Dispute Type indicates whether the dispute is Designated (DD) or Non-Designated (ND).
2	FLD	Dispute Reason	1	Mandatory	AN(3)	This is the reason that the invoice item number is being disputed. Refer to <i>Market Message Implementation Guide – DUoS and Transaction Payments</i> for reason codes.
2	FLD	Dispute Status	1	Mandatory	AN(10)	Dispute Status identifies whether the dispute is in progress, accepted or denied.
2	FLD	Date Raised On	1	Mandatory	AN(8)	Date Raised On identifies the date on which the dispute was notified to ESB Networks by the Supplier.
2	FLD	Date Resolved On	1	Mandatory	AN(8)	Date Resolved On identifies the date on which the dispute was resolved by ESB Networks.
1 Foot	er	•	1			This item denotes the end of the particular flat file provided and control information on the number of records.
2	FLD	Segment ID	1	Mandatory	NUM(1)	This is an identifier to categorise the level in the file 1 = Header Record (1 record only) 2 = Item Detail Record (1n records) 3 = Footer Record (1 record only)
2	FLD	Total Records	1	Mandatory	NUM(9)	The total number of detail records in the file, excluding the header and footer line.
