Version Number	1.0		
Status			

Agenda:

1.	General
2.	Actions from Previous IGGs/Conference Calls
3.	New IGG Actions
4.	CRU Update
5	Retail Market Design Service Update
6	MRSO Update
7	ESBN Update
9.	Version 1 Update
10.	AOB

1. General

A Stanciu requested approval of the previous IGG Minutes of 9th September 2026.

Minutes v1.0 approved.

2. Actions – Previous IGG

S McKeivitt advised no current open action items.

3. Actions – New IGG Actions

No new actions were logged.

4. CRU Update

F Crowe gave the CRU update.

For additional customer protection measures, CRU is ready to publish as soon as approval is received.

On the consultation on the supplier handbook, the consultation period was extended until the 30th of October.
I Mullins queries the BAU nature of the additional measures, and highlights risks to and concerns of MPs.
D Power clarifies for MPs.

5. Version 1 Update

R McLaughlin provided the Version1 update.

SAP4/HANA approach has gone out and V1 now dealing with 2 new entrants.

A O'Lactnain queries what expectation there is for changes affecting MMs and such, and what the position of V1 is, R McLaughlin highlights that changes would be communicated by ESBN rather than V1.

I Mullins queries assurance approach plan on the page and if any further details will be provided. C Leen highlights that functional testing is underway and further updates will be provided monthly going forward.

6. Retail Market Design Update

S McKevitt gave the Retail Market Design Update.

Outage scheduled for October 27th is postponed, once update is available RMDS will contact MPs with the correct date.

7. MRSO Update

J Long gave the MRSO update.

8. ESB Networks Update

AMI October Upgrade Cut Over Approach – C Leen highlights changes being made to approach. Plan is to run initial upgrade on Thursday 22nd, resume on Friday 23rd, largest component on Saturday 24th to de-risk. Strong business validation testing planned for each step of upgrade. C Leen asks for RMDS to share slide deck post-IGG.

ESBN expect to issue the estimated interval data during normal processing windows on the morning of Monday 26th. Post cut-over call to be organized through RMDS with MPs.

E Porter gave the ESN RMS update.

TIBCO Hub and EMMA upgrade – E Porter advised that the recent upgrade was successful, hypercare is to come to an end by close of October, there have been no issues identified and performance testing carried out was very effective and thanks noted for those Market Participants that supported The TIBCO Hub will continue to be monitored until end of hypercare.

Market systems Update– E Porter advised of the September issuance of higher volumes of estimated data and an intermittent issue that was caused by a wider external network/connectivity issues. She also referred to the action linked to previous issues discussed in July IGG, in which ESN were having ongoing engagements with the vendor around higher volumes of estimates being issued. A change has recently been implemented around this issue, and it continues to be monitored for effectiveness.

I Mullins asks if this issue has occurred post change, E Porter advised the issue in September relating to the issuance of higher numbers of estimates happened prior the change was implemented.

C McGeown asks if this relates to the affected de-engs also. E Porter advised that the de-energisations were related to the wider external network connectivity issue. De-engs were placed on hold as a precautionary measure, answering C McGeown question. Changes made so SMART services will be supported if this happens again. C McGeown asks if there is any further information available on this, E Porter confirms as it was an external issue, there is no more information other than this update today

E Porter covers some AOB:

- Consultation on the Retail Market System Development Plan – E Porter thanks suppliers for providing feedback and the consultation is now closed, five responses received and this feedback is being reviewed and collated for sharing with the CRU
- SSL Certificates – Proposed options continue to be explored for suitability. Some more time will be required for this process, and updates will be provided at next IGG.
- MP 1-1s – Invites have been issued to Market Participants directly from ESN. If you wish to avail of a 1:1 and have not received an invite, please contact ESN Networks via RMDS.

- New (MDR)Market Discussion Request – A new MDR is in progress with ESNB with a view to bring for the next IGG to capture minor updates required to the current Working Practice 31 (Interim Retail Market Microgeneration Solution) to reflect the new and separate registration process for Plug-in Microgeneration. All other steps in the working practice will remain as is.
-

9. AOB

Next Steps

A Stanciu outlined the following dates in the calendar.

Next IGG:

- Wednesday 4th November 2026, 11am on Microsoft Teams.

A Stanciu thanked MPs for attending the meeting.
