

Discussion Request 1235			Estimated Re-Energisation Reading		
Status	Issued to Market	Priority	Medium	Status Date	22/08/2024

Date	Version	Reason for Change	Version Status
22/08/2024	1.0	Shared with IGG	Final

Part 1 DETAIL OF DISCUSSION REQUEST / MARKET CHANGE REQUEST	
Requesting Organisation(s)	ESB Networks
Request Originator Name	Siobhan Melvin
Date Raised	22/08/2024

Classification of Request	
Change Type	Non-Schema Impacting

Detail of Request	
Reason for Request	

Background

Re-energisation normally take place to an actual reading. However, there are occasions when re-energisation takes place to an estimated reading. These include:

- the actual reading returned is deemed implausible
- the NT did not gain access to the meter when completing the re-energisation therefore no meter reading was provided

When this occurs an estimated reading is provided to the supplier on the 307MM. However, the estimate is flagged as an Actual as the Meter Works Retail Market Message Guide for the 307MM currently only permits a Read Type of 'A' Actual.

Proposed Solution

Amend the following fields in the 307MM Meter Point Status Change Confirmation – Energisation to include:

- Read Type:
 - *E – Estimate (No Access)*
 - *EF – Estimate (Implausible/No Read available)*
- Read Status:
 - *REST – Reading was estimated and usage factors deriving from estimate will be used in Settlement. See Read Type for reason for estimate.*
 - *RENS – Reading was estimate but usage factors are not updated and will not be used in settlement. This is generally because a full set of readings was estimated due to implausibility.*

The proposed codes above align to the 306MM.
