

Market Change Request 1216			Smart Metering Remote Operations		
<b>Status</b>	Issued to Market	<b>Priority</b>	Medium	<b>Status Date</b>	26/06/2024

Date	Version	Reason for Change	Version Status
31/01/2022	1.0	Issued to Market	Final
16/03/2022	1.1	Re-versioned due to impact of DR1219 V1.1	Final
18/05/2022	2.0	Re-versioned to update links to Market Documentation	Final
21/09/2022	3.0	Updated to reflect changes during Re-versioning Exercise for v14.00.00	Final
03./10/2022	V4.0	Updated to reflect re-instatement of ODP validation for V14.00.00	Final
09/01/2023	V5.0	Updated to include MM307 as impacted	Final
02/08/2023	V6.0	Updated to include MM014R and M116R as impacted and removal of MM308 as impacted.	Final
28/05/2024	V7.0	Updated to reflect changes during Re-versioning Exercise for v14.00.00. This includes; <ul style="list-style-type: none"> <li>• Webservice Guide_Webservice Meterdata excel file <ul style="list-style-type: none"> <li>◦ Added DeEnergised Remote to the MeterPointStatus Field descriptions to align to corresponding Word Document.</li> </ul> </li> <li>• Meter Works Market Message Guide Amendments to the Message Structure/Message Validation for MM017 – Access Arrangement Field</li> <li>• MPD04 – SoLR Process Process Descriptions(2.1) and Supplemental information(3) updated to reflect new DR status.</li> </ul>	Final

Part 1 DETAIL OF DISCUSSION REQUEST / MARKET CHANGE REQUEST	
<b>Requesting Organisation(s)</b>	NSMP
<b>Request Originator Name</b>	Donal O'Connor
<b>Date Raised</b>	25/06/2021

Classification of Request	
<b>Change Type</b>	Schema Impacting

### Detail of Request

**Background**

In late 2007, the CRU, working closely with the Department of Communications, Energy and Natural Resources (DCENR), established the National Smart Metering Programme (NSMP). In Phase 1, a trial was carried out in order to assess the costs and benefits of smart meters and to inform decisions relating to the full rollout. In July 2012, a decision was announced to rollout electricity and gas smart meters for all residential and small and medium sized businesses. Phase 2 commenced in January 2013 and broadly composed of a high-level design and procurement phase. [CER14046].

The Smart Metering High Level Design Decision Paper published in October 2014 outlines the decisions with regard to the high level design stage within Phase 2 with regards to 1) Core Design, 2) Time of Use Tariffs, 3) Presentation of Energy Usage information to consumers and 4) Pay As You Go (PAYG) solution.

The original NSMP Programme plan envisaged a “big bang” delivery of all NSMP functionality for electricity, gas and in-home data Smart services, with an estimated delivery date in 2023. In early 2017 ESNB submitted a revised proposal to the NSMP to CRU, outlining a phased approach to the delivery of Smart Metering and the NSMP High Level Design (HLD). The proposal foresees delivery over three distinct phases. This Phased Approach proposal has been positively received by CRU and Energy Suppliers and now forms the basis of ESNBs plans and assumptions in respect of the NSMP. The CRU approval of the phased approach was publicly announced in September 2017.

Phase 1 was completed in March 2021 and delivered the installation of 250,000 Smart Electricity Meters. With the Market Schema Release delivered as part of this phase, all system, business and market changes were completed to allow 30-minute interval data to flow to Suppliers via the Market Systems and for Interval Data to be used in all market processes including DUoS Billing and Market Settlement Aggregation.

Phase 2 will deliver the installation of an additional 1 million Smart Electricity Meters by the end of September 2023. With the Market Schema Release at the end of September 2023, all retail market use cases requiring remote and local operation of the service switch in Smart Electricity Meters will be enabled. Smart Pre-Payment services with remote de-energisation/energisation can begin after this phase.

Phase 3 will deliver the installation of an additional 1 million+ Smart Electricity Meters by September 2025. Along with the Market Schema Release in September 2025, Gas Smart Metering Services and In-Home Data Services will be enabled.

NSMP Programme has implemented Phase 1 and Phase 2 has commenced. It is within this 2nd phase that the Smart Metering Remote Operations activity has commenced.

This MCR provides details of the Retail Market Design changes associated with Smart Metering Remote Operations.

**Proposed Solution**

This details the changes required to the Retail Market Design to enable the utilisation of the Remote Switch functionality of the Smart Meter.

This contains the offering of a Remote Switch capability in the following scenarios:

- De-Energise Non NPA
- De-energise NPA
- De-Energise PAYG
- Re-Energise Non NPA
- Re-energise NPA
- Re-Energise PAYG

The PAYG (D05/E05), Non-NPA (D01/E01) and NPA Re-Energisation (E02) requests will be enabled as part of the market release, the functionality for NPA De-Energisation (D02) requests will be built as part of this release, and CRU direction will indicate its enablement.

Changes to Market Messages, Data Items, Data Definitions and Data Codes are contained in the linked amended Design Documents (with track changes).

**De-Energisation Non NPA and NPA**

For Single Phase sites with a CTF level of 4, these will be carried out remotely, a site visit will be initiated where CTF <4 and a site visit will be initiated where intermittent comms prevent the operation of the remote switch.

**De-Energise PAYG**

For Single Phase MCC12 sites with a CTF level of 4, these will be carried out remotely and a rejection will be issued where intermittent comms prevent the operation of the remote switch.

**Re-Energise Non NPA, Re-energise NPA, Re-Energise PAYG**

Where a site has been de-energised remotely these requests will be carried out remotely, and a site visit will be initiated where intermittent comms prevent the operation of the remote switch

Requests received outside of the allowable de-energisation period will be rejected unless the required data provided is within the de-energisation period, De-energisation period as defined in the De-Energisation code of Practice, PAYG Consultation and the Electricity and Gas Suppliers Handbook.

As Per CRU Smart Metering Phase 2 Scope currently for Non-Interval sites a de-energisation and re-energisation confirmation cannot be carried out on the same day. The following change will allow Suppliers to be informed where a De-energisation and Re-energisation occurs on the same day.

**MM106D and MM106E changes**

These will be sent for all Non-Interval sites as well (unmetered will remain as is) where there is a de-energisation or re-energisation

**Non Interval same day De-energisation and Re-energisation**

Where a De-energisation and Re-energisation are carried out on the same day, the MM306 won't be sent and the MM307 will be sent as normal

**Issuing of MM307W**

Where a change from a Non-Interval MCC is carried out on the same day or the day after a Re-energisation the MM307W is issued.

**PAYG during CoS window**

PAYG De-energisation/Re-energisation requests will be allowed during the CoS window.

The Prioritisation process for the V14.00.00 Schema Release, due to take place in September 2023, will indicate which MCR's are due to be implemented.

If approved this DR/MCR will be included along with the following other approved MCRs:

- MCR1210
- MCR1209
- MCR1208
- MCR1193
- MCR1189
