    - Testing is delayed. Impact currently being assessed.

v14.00.00 Release – Status

MCR	Version	Description	Completed Milestones	Status
1189	7.0	Additional code in the 017MM to select a de-energisation with a service removal	Schema Draft 2 released	🟢
1209	7.0	Annual Consumption for HH Sites	Schema Draft 2 released	🟢
1216	6.0	Smart Metering Remote Operations	Schema Draft 2 released	🟢
1219	5.0	SPAYG System and Process changes necessary to deliver policy	Schema Draft 2 released	🟢
1208	2.0	Smart Metering Default Data	None. Delivery blocked, dependant on the Smart Metering Data Access Code	🔴
1221	2.0	Contingency Process for Failure in SPAYG Technology Chain	MCR Baselined	🟢
1222	1.1	SPAYG – CTF Algorithm Suitability for SPAYG Service Provision	Delivered	🔵

Note:

- As communicated through ILG and SSG, a small number of v14.00.00 design specs were more complex to close out than forecast. Timeline for design is extended to 22/9/23.

- Build and FUT timelines are extended.

- ESBN's view is that this will not impact on Go-Live as delay is absorbed within system integration testing.

Upcoming Milestones this Month:

　　None.
